Gas Systems Corporation-McKinney, TX replaced a costly liquid nitrogen (LIN) supply system with an onsite Nitrogen PSA Generator for Sterigenics' Ontario, California facility. This installation represents the second nitrogen generator that Gas Systems has installed at a Sterigenics facility within the last three years. The total dollar amount realized in this cost savings initiative has been a pleasant surprise to Sterigenics.

Sterigenics, Inc. – Oak Brook, IL is a global supplier of sterilization solutions to the medical device and pharmaceutical industries, using Ethylene Oxide (EO), Gamma and Electron Beam (E-Beam) radiation technology.
